

ISO14001:2015 EMS Training

www.aa-academy.co

OVERVIEW

Environmental issues are one of the major challenges that business organizations have to face and mitigate nowadays. ISO14001:2015 is an environmental management system (EMS) which aims to help organizations in this regard. It provides a framework for management to identify and control the environmental aspects and impacts. A more sustainable business system can then be established. This may also give rise to new market opportunities as consumers are becoming more interested in environmentally friendly brands.

LEARNING OUTCOME

By the end of this course, participants should be able to:

01 Understand the requirements of ISO14001:2015 and evaluate their organizations accordingly.
